DESCRIPTORS: *Steel, *Alloys, *Iron, *Phase studies,
Microstructure, Crystal structure, Austenite,
*Transformations

Twenty-five different alloys, including high purity
metals, prepared in the laboratory and industrial steels
of various kinds were studied. The irons without car-
bon showed very strong supermelting (to nearly 180°C).
All of the irons observed did not show very high super-
melting. The presence of deoxidizers in the metal like
